

Mega Five Trading Company Limited

27" Indoor high-resolution LED Displays

The panel is made with the international golden ratio (16:9). It is perfect for showing videos, PowerPoint slides, and other content. Each LED Panel has a 27" diagonal in a 16:9 aspect ratio which allows most common formats in full without compression.

Quick installation and dismantle

Thanks to the cable-free connection design, it creates flexibility in installation and dismantles.

Save cost in installation

Not only cable-free features, thanks to the Ultra-thin and Ultra-light design, but the panel is also just 38mm thin and 5kg weight. It does not only save time on installation but also reducing the labor in installation and material on the wall mount.

Quick maintenance

Each panel contains 8 LED modules that can easily be replaced by using a magnetic tool at front of the wall. It can largely reduce the downtime of the wall.

Redundancy Power and Signal supply (Optional)

To offer the shortest downtime of the LED, the customer can select the optional redundancy power and signal supply module. This feature is highly recommended for the application in transportation, broadcasting, security and control room.

16:9

Adopt International golden ratio 16:9

Perfect splicing combination,

Create multi-application suitable for all application
